

The Global Leader in
Collaborative Material Development Software

Streamlining Material Development for the World's Leading Brands!

TEXbase has created a revolutionary web-based platform, enabling Brands to collaborate with their supply chain partners to streamline material development. Through TEXbase *Connect*, Brands can communicate in real-time with their global fabric mills to decrease cycle time, reduce operating costs and increase product innovation and integrity.

Key Benefits:

- Collaborate in real-time, world-wide with your entire supply-chain
- Reduce cycle-times and Shipping Costs
- Increase product innovation and Integrity

Created specifically for the Apparel and Textile Industry, TEXbase *Connect* is the only software tool creating efficiencies at the front end of the development, beginning at the Fabric Level. Work with any supplier world-wide on importing fabrics directly into development, paperless approval of Performance Specifications, Lab Tests and soon, Lab Dips!

{ TEXbase is *The Software Solution for Real-Time Supplier Collaboration* }

Breathability Tests					
	#1	#2	#3	Pass	Note
Breathability, g/m ² /24 hrs.	10	13	15		

Pilling Tests					
	#1	#2	#3	Pass	Note
Random Tumble P18, 30 Min., Deck, visual	10	30	40		
Random Tumble P8, 10 Min., Face, visual	15	30	25		

Shrinkage Tests					
	#1	#2	#3	Pass	Note
Shrinkage in Length, CTL, percent	6	10	7		CTL percent critical to shrinkage length
Shrinkage in Width, CTL, %	75	65	60		Must be closer to 60

TEXbase LabConnect: Communicate with Textile Vendor Partners instantaneously on Lab Data Testing

TEXbase SpecConnect: Automate decisions on Performance Specifications through a digital electronic signature

TEXbase FabricConnect: Search the fabric libraries of your textile vendors online and instantly import materials into your internal library and directly into development
