A Comprehensive Approach to Product Compliance

Key Benefits:

- **Centralized storage of lab tests and component part certifications**
- **One-Click GCC creation**
- **Optional GCC Portal for public, manufacturer and Customs access**

- Engineer materials, build product specifications and create reasonable testing plans.
- Electronically sign specifications to clearly communicate expectations throughout your supply chain.
- Capture component part certifications and attach to relevant products.
- Build templates of certification requirements by product category and apply them to certified products.
- Capture live feeds of test reports from suppliers, manufacturers and testing labs.
- Automatic notification of non-compliant products.
- Link test reports to product certification requirements.
- Track test report and certification expiration dates.
- Manage workflow across team members to track status of certified products.
- One-click GCC creation and optional GCC portal for external stakeholder collaboration.
