

Helping to Reduce costly Development and Production Errors

**TEXbase allows us to
do what we do best...
– Innovate."**

Bill Mickle, Director of Materials Management

TEXbase *Connect* allows brands and their suppliers to share data electronically within both production and development. This drives the elimination of many costly development and production errors, increasing profit margin. Created specifically for the Apparel and Textile Industries, *Connect* is the only software tool designed specifically to create efficiencies throughout the lifecycle of a material - from concept through bulk production.

Assurance that your Test Standards and Data are Consistent

Key Benefits:

- Reduce Development Quality Errors
- Reduce Bulk Production Quality Errors
- Increase Collaboration with Your Supply Chain
- Reduce Turn Times

- Aligns all departments within your apparel brand to your suppliers on the same global platform
- Reduce MCT (Material Cycle Time) by 37%
- Instantly update your supply chain as standards improve or change, eliminating the need for resending spec books or updated pdf files
- Search, view and import fabric details directly from your supplier's fabric libraries
- Collaborate with your supply chain to sign performance specifications electronically (E-sign)
- Submit and receive lab tests online, directly with your suppliers
- Receive instant notification of work completed by your suppliers
- Dashboard visibility into supplier's response times, past due tests and test status

Improve Your Innovation while Increasing Profits - Contact TEXbase Today!

Supply Chain Management... *Simplified*

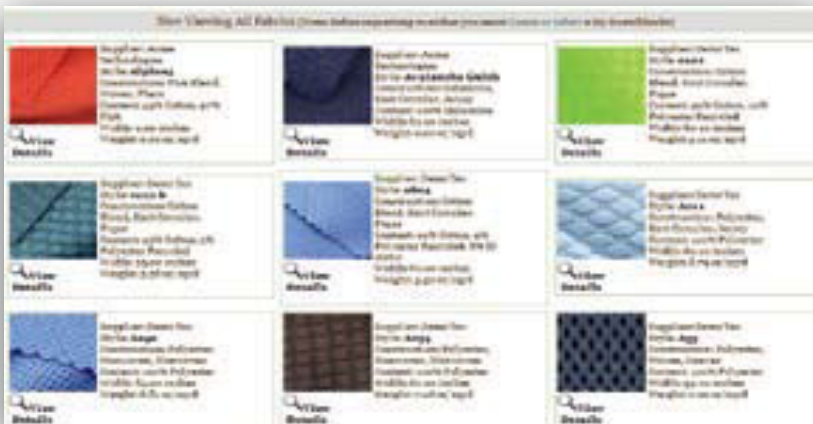

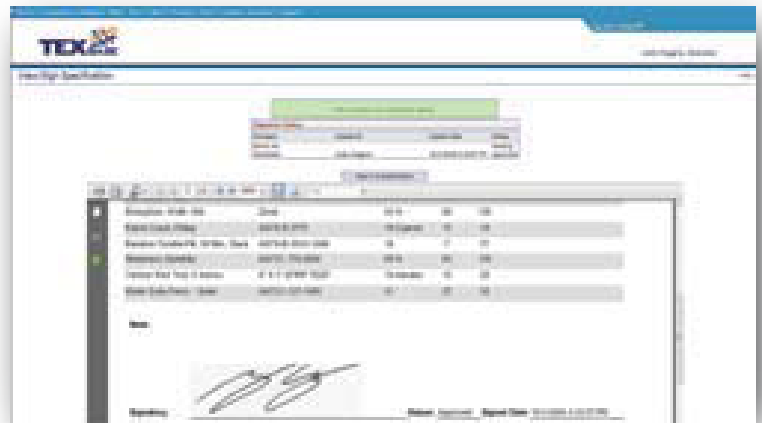

Breathability Tests					
	#1	#2	#3	Pass	Notes
Breathability, g/m ² /24 hrs.	10	15	25		
Filing Tests					
	#1	#2	#3	Pass	
Random Tumble P/B, 30 Min., Deck, visual	20	30	40		
Random Tumble P/B, 10 Min., Face, visual	45	50	25		
Shrinkage Tests					
	#1	#2	#3	Pass	Notes
Shrinkage in Length, CTL, percent	5	10	7		CTL percent critical to shrinkage length
Shrinkage in Width, CTL, %	75	60	60		Must be closer to 60

TEXbase LabConnect:

Communicate with material suppliers instantaneously on material testing for development, quality control and compliance.

TEXbase E-Sign:

Automate the process of signing specs online using digital signatures.

TEXbase MaterialConnect:

Search the fabric libraries of your textile suppliers online and instantly import material data into your internal library and directly into development.
