

TEXbase Solutions and SaaS Platform:

- TEXbase provides a Software as a Service platform to manage material lifecycle data in a secure, centralized location
- TEXbase does not require additional IT resources, server installation, or capital expenditure
- TEXbase is cost effective with flexible per user, per month payment options
- TEXbase is fast and easy to implement, configuring and training new clients in a matter of weeks
- TEXbase provides instant upgrades on a regular basis at no additional cost
- TEXbase can integrate data and workflow with any PDM/PLM or ERP system
- TEXbase offers comprehensive training with unlimited email and phone support
- Business process analysis (BPA) from our expert team is included in training
- No Software maintenance fees

MATERIALS

Key Benefits:

- **Decrease Material Cycle Time (MCT) by 37%**
- **Reduce Direct Labor Costs (data entry)**
- **Increase Efficiency Gains 100-500%**

TEXbase MATERIALS enables apparel teams to more effectively manage fabric and trim developments, material sourcing, and performance specifications. Your teams will increase their efficiency allowing more time for innovation.

- Streamline project management with added visibility into; project status, deadlines and team efficiency - maximizing the productivity of your existing workforce
- Centralized, web-based material data available instantly to your entire global team
- Instant tracking and reporting on materials, developments, and specs
- Enhanced management and tracking of supplier information
- Quickly create and clone performance specifications
- Dashboard visibility of development status and new fabrics from suppliers

QUALITY

Key Benefits:

- **Reduce Quality Errors**
- **Reduce Direct Labor Costs (data entry)**
- **Reduce Development Time from 3 weeks, to 3 days**

Increase the quality of your materials by clearly defining test methods across your entire supply chain. TEXbase QUALITY creates an environment where your testing practices and test standards are consistent both internally and externally.

- Monitor supplier performance to better manage and improve quality standards
- Quickly create reports and analysis of lab data, spotting trends in development and production
- Analyze, compare, and track historic lab tests by material, season, and concept
- Create lab test requests directly from performance specifications
- Quickly access and modify test request templates, increasing the speed and accuracy with which new submits are entered
- Enhance data integrity and maintain testing history to create the necessary audit trail to comply with restricted substance legislation
- Dashboard visibility into test/spec status, turn times, and work-in-progress

Improve Your Innovation while Increasing Profits - Contact TEXbase Today!

COMPLIANCE

Key Benefits:

- **Centralized storage of lab tests and component part certifications**
- **One-Click GCC creation**
- **Optional GCC Portal for public, manufacturer and Customs access**

TEXbase COMPLIANCE provides the tools that help quality and compliance professionals meet the requirements of legislation such as the Consumer Product Safety Improvement Act.

- Manage workflow across team members to track status of certified products
- Capture live feeds of test reports from suppliers and testing labs
- Acquire component part certifications and attach to relevant products
- Automatic notification of non-compliant components and products
- Track test report and certification expiration dates
- Build templates of certification requirements by product category and apply them to certified products
- One-Click GCC creation and optional GCC Portal for external stakeholder collaboration

COLOR

Key Benefits:

- **Accelerate Color Workflow to Increase Efficiency by 35%**
- **Automate Color Data Management**
- **Real-Time, Global Color Team Collaboration**

TEXbase COLOR Streamlines your color approval processes and lab dip management. Real - time color management, tracking and reporting reduces your lab dip cycle time and eliminates redundancy.

- Issue reports on lab dip status as well as summary of product, fabrics used in that product, and dips on each fabric
- Reduce operational expenses through efficient lab dip information management in one globally centralized location
- Eliminate static Excel Worksheets
- Track status, manage workflow of lab dips instantly
- Global color teams can view lab dip status by season, product, color or iteration
- Track historic lab dips to eliminate duplication
- Dashboard visibility into lab dip status and past due status

**CONNECT**

Key Benefits:

- **Reduce Development Quality Errors**
- **Reduce Production Quality Errors**
- **Reduce Turn Times**

The *Connect* Global Platform gives apparel brands real-time access to their supplier's development and production data. This drives the elimination of many costly development and production errors, increasing profit margins.

- Aligns all departments within your apparel brand to your suppliers on the same global platform
- Reduce MCT (Material Cycle Time)
- Instantly update your supply chain as standards improve or change
- Search, view, and import fabric details directly from your mill's fabric libraries
- Collaborate with your supply chain to e-sign performance specifications
- Submit and receive lab tests online, directly with your suppliers
- Dashboards provide visibility into key performance indicators
