

MaterialFirst Marketplace Is An Exclusive Shared Library Built Into Texbase.

MaterialFirst Shared Libraries is the first place to look for new materials from current suppliers or find materials from new suppliers that are completely vetted by your peers. For material providers or ingredient brands, it is the most effective way to market your materials to existing or potential customers.

MaterialFirst Shared Libraries are curated from Texbase supplier collections selected to share with our established brand audience. Fabric and component details such as sustainability, certifications, construction, content, and images. It includes the ability to dynamically import the object profile information directly into your Texbase library to facilitate further development eliminating dual data entry.

Suppliers and buyers save time, shorten the development cycle, & eliminate waste with MaterialFirst Shared Libraries.

Speed Development Cycle

Develop from Concept to Finished Product

MaterialFirst utilizes a double opt-in security feature allowing the data provider and the data consumer to both agree to exchange material information before any data is shared. It also allows either company to rescind their commitment to the other company and therefore prevent any further MaterialFirst collaboration.

Streamlined Access to New Materials

MaterialFirst allows both data providers and data consumers to shorten the development cycle. Data Consumers can view fabrics and components (including item details) and determine if they would like to request a sample. This reduces the number of samples a Data Provider needs to ship - saving time, money and eliminating waste.

Featured Functionality

Accelerate Developments

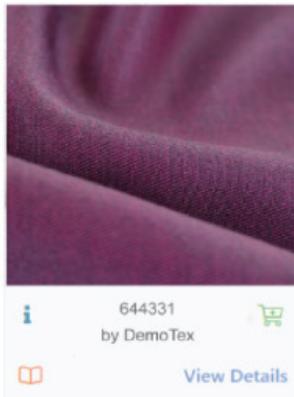

Buyers can dynamically import object profile information directly into their Texbase libraries to speed development & eliminate dual data entry. Suppliers easily track library requests and imported objects. Easily export to excel and empower your sales and marketing teams with specific and timely information to close sales. Provides 24-hour global access to your certified products.

Streamlined Access to New Materials

Suppliers can easily share materials to reach new buyers. As a result, brands that have an interest are allowed access to new materials with built-in accurate real-time material data. In addition, MaterialFirst Marketplace will enable suppliers to share with multiple brands and facilitate a more efficient workflow to grow the suppliers' customer base.

Robust Search Options

When visitors access a shared library, they will find user friendly search tools allowing them to search by certification, fiber, structure, construction, finished weight, performance variables and vendors.

Texbase Core Functionality

MaterialFirst includes the robust functionality of Texbase including, Testing, Color, Compliance and Material management. Data Providers can use Texbase as their system of record for their full material library, lab tests, customer testing specifications, GCC's, lab dips and more. MaterialFirst can also be optimized into a full online Global Library that can be visited on your company website.
