Testing Accelerator

A Complete Lab Testing Solution

The Texbase Testing Accelerator combines the features of Texbase Materials & Testing with the global lab testing capabilities of third-party labs to create an integrated solution for lab test data management. As the lab completes lab tests for Testing Accelerator customers, both the lab test data and the final report are automatically sent to Texbase providing one central location for all lab test data no matter where the testing is performed.

When you sign up for Texbase Testing Accelerator your company is automatically connected to a third-party lab using the Texbase Connect secure collaboration network.

The Best of Both Worlds – Integrated Together
Texbase and third-party labs have joined forces to make it easy for companies to learn from the experts who know how to test and combine that with the team at Texbase who know how to manage lab data. The result is an integrated approach that streamlines the process of deciding what to test for, how to test it, the data you need to capture, automatic pass/fail and the ability to quickly make decisions based on test results.

Pre-Configured Lab Test Protocols
Testing Accelerator customers benefit by having their Texbase Testing module pre-configured with testing protocols defined by third-party lab professionals. This makes it easy to get started knowing your lab test protocols are ready to go – right from the start.

Default Specifications for Common Material Types
Default lab test specifications for common material types are automatically created within Texbase Testing. This makes it easy to know what to test for, based on the material being tested and their most common end-use requirements. These templates can then be modified to meet the needs of special cases.

Lab Test Requests
Texbase Testing makes it easy to generate a new lab test and assign it for testing. Testing Accelerator accounts come with a default set of Lab Test Request form that makes it simple to create and print or email a PDF that clearly communicates what material is being tested and what it needs to be tested for.

Centralized Data Management
Lab Test results are captured within Texbase Testing and linked to the materials being tested. Each lab test displays both the data and the calculated results, provides automatic pass/fail visual cues and embeds the expected values from the specification providing all the information needed to make decisions regarding fitness for a particular use.
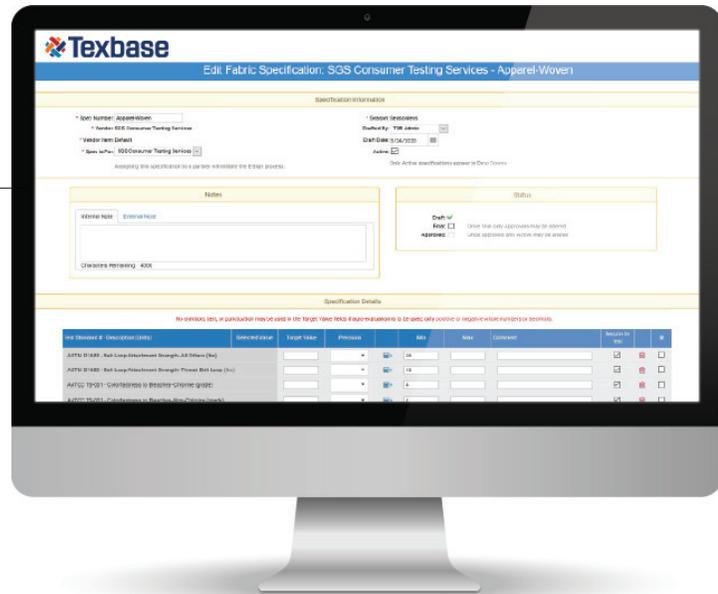

Track Progress, Analyze Data and Create Reports
Texbase Dashboards provide views into lab work in progress while data comparison tools make it easy to analyze data and create reports to communicate results. Use the tools within Texbase Materials and Testing to automate your material development and QC processes to accelerate you speed to market while maintaining the data needed to validate decisions and maintain quality throughout.

Test Report

No. 1 Workshop, M-11, Middle section, Science and Technology Park
Shenzhen, Guangdong, China 518057

Report No. :   ABC01234/2020
Page :   1 of 10
Date :   JUNE 15, 2020

Company AB
111 E. 12th Street, Bozeman, MT 59718

The following merchandise was submitted and identified by the applicant as:

Product Description: FABRIC No.7MTN1-4-5-3-TA-TC-F
Style/Item No.:   13-000056 A-1.00
Manufacturer/Vendor: ABC
Country of Origin: USA
Additional Information: 1. Manufacturer No.: 1234556
    2. Fabric, 17 samples, Qualification

Texbase Technology

Texbase software is purpose-built by industry and technology experts, delivered as a service using a secure cloud infrastructure and is accessed by a web browser. The system is standards-based using best-in-breed software, hardware and management practices. Multi-layer security architecture ensures data protection and secure collaboration, and the infrastructure is housed in a Tier-3 data center providing redundancy and resiliency.

About Texbase

Texbase provides compliance, quality and materials management software solutions that power great product experiences. We innovate quality assurance data management, supplier collaboration and product compliance solutions for the apparel, footwear and consumer products industries. Texbase is a pioneer in web based business solutions and collaboration platforms that unite brands, retailers, suppliers and testing labs that trace compliance and quality from raw materials to finished product.
